

## Dissemination Report SCS of Mytilene

As a Second Chance School of Mytilene we organized an Dissemination Day of the Results of the Erasmus+ Program for the school. year 2022-23 along with the Music School of Mytilene, the Model General High School of Mytilene, the Model High School of Mytilene, the High School of Agiasos Lesvos, and the 4th High School of Mytilene in order to present the knowledge and experiences gained within the framework of the Erasmus+ program, implemented during the 2022-23 school year.

The participants in this event were around 70 teachers from schools around the island of Lesvos.

Our presentation focused on the teaching strategies applied to the main target second language learners with little or no educational experience previous to migration. We also described the main focus of the project which is serving a group of learners whose human right to education have been violated in their past.

The event was also published to the social media and the local media.
